CPOSC 2013

Robots Need Senses

- Vision
 - To detect
- Hearing
 - To hear and locate commands
- Touch
 - To manipulate
- Speech(*)
 - To argue

But I Don't Have a Robot!

- Many robots use commodity hardware.

Vision

- **Uses**

- License plate recognition
- Logo recognition
- Motion detection

Vision: Face Detection

- **Uses**
 - Keep screen awake.
 - Lock screen.
 - Pause video when not watching.

Vision: Face Detection

- **Project: OpenCV**
 - Computer vision suite
 - Tons of features
 - **Linux, Android, OSX, iOS, Windows**
- Demo: `./facedetect.py`
 - Angle and facial expression critical
 - Tied to training data

Vision: Face Detection

- Uses
 - Find human weak points
 - Neck is positioned below the face area.
 - Eye location often provided.

Vision: Face Recognition

- **Uses**
 - Tagging/sorting of photos
 - Custom doorbell project
 - e.g. "Skippy is here."
instead of "ding-dong"
- Requires training

Vision: Face Recognition

- Uses
 - Identify resistance leaders for target prioritization.
 - Test disguise effectiveness.

Hearing: Localization

- Trivial to detect sound
 - Nontrivial to figure out its source.
- **Uses**
 - Determine room/zone occupancy
 - Target PTZ camera
- **Projects**
 - **ManyEars**
 - **HARK**

Hearing: Localization

- Uses
 - Locate living humans

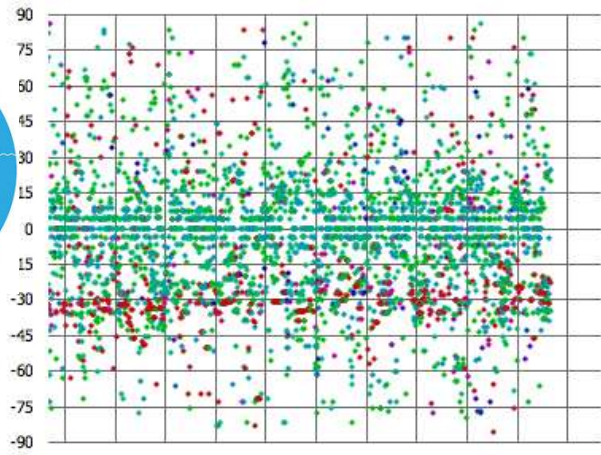

Localization: ManyEars

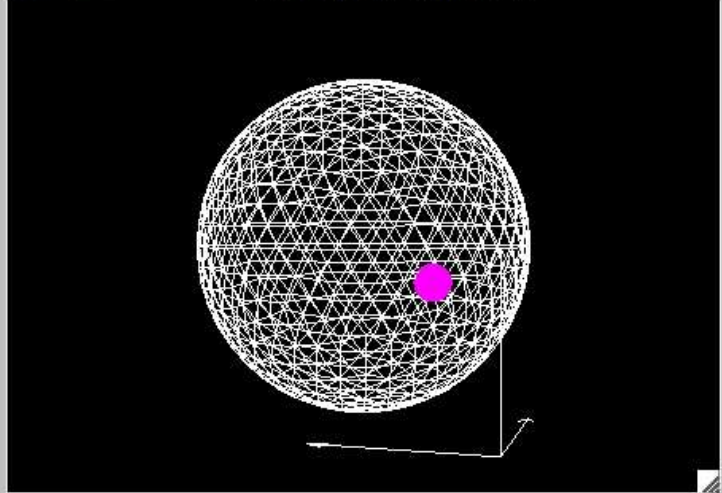

- **Linux, OSX, Windows**
- Specialized hardware
 - OpenHardware
 - 8 microphone inputs
 - Realtime constraints
 - CDN \$1000 pre-made
 - CDN \$670 DIY

8SoundsUSB

Tracked sources: 3D Sphere

Localization: HARK

MicroCone, USD \$360

- Open Source
 - Only official support for **Ubuntu**
 - Based on ManyEars
- Localization + Separation + Recognition
- Specialized hardware
 - *Not open*

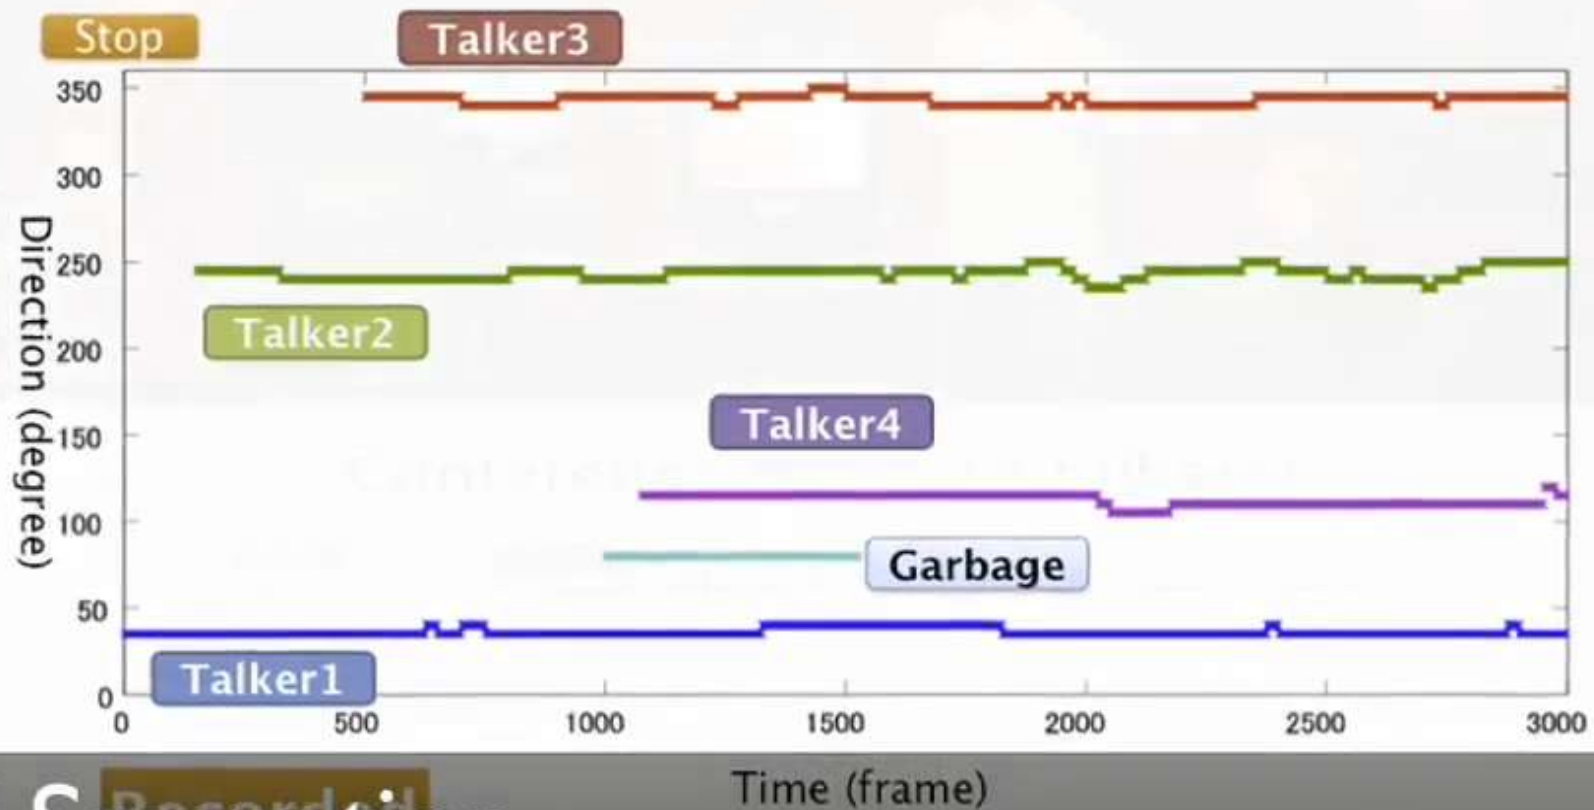

Localization: HARK

- Each sound source can be localized.
- Simultaneous audio can be processed into separate audio channels.
- Speech recognition can be done on each channel.

Conference Room (4 talkers)

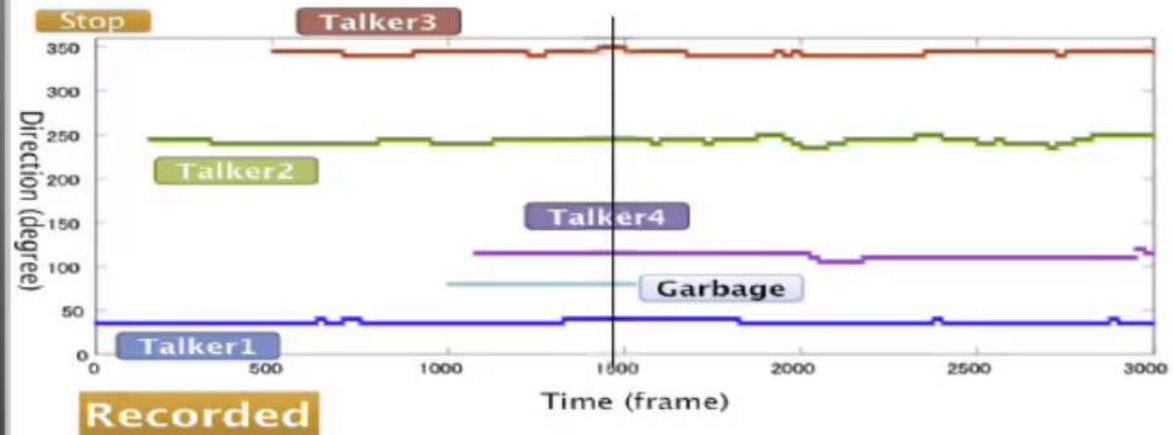

Sound Separation

Sound Separation

Conference Room (4 talkers)

Sound Separation

Conference Room (4 talkers)

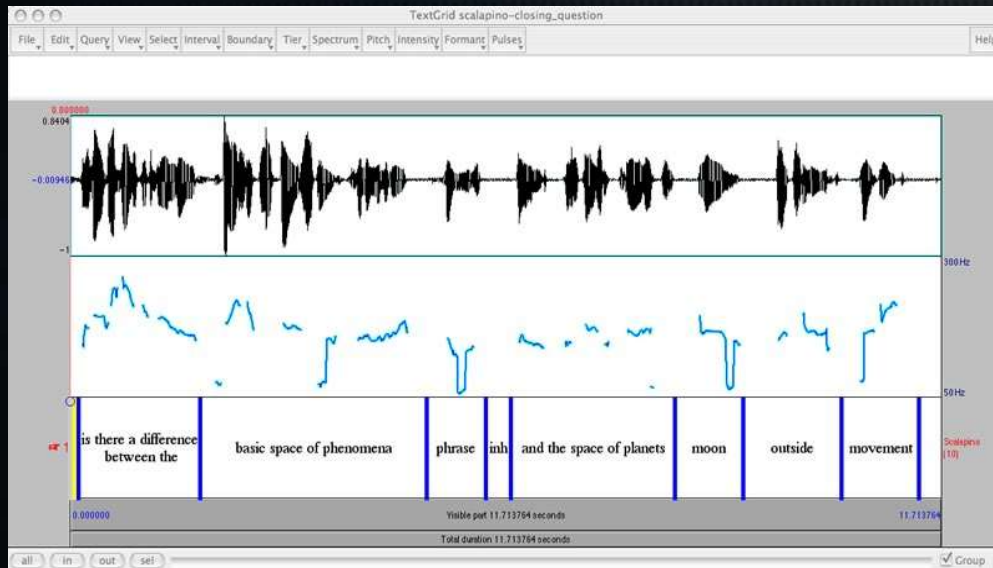

Hearing: Speech Recognition

- **Uses**

- Front-end to automation suite
- Occupancy detection

- **Project**

- **Julius**

Recognition: Julius

- **Linux, Windows**
- Continuous recognition
- Great for domain-constrained inputs.
- You need an acoustic model.

Recognition: Julius

- Acoustic model:
http://www.repository.voxforge1.org/downloads/Main/Tags/Releases/0_1_1-build726/
- Things to change
 - A dictionary
 - Words and the phonemes that make them.
 - e.g. [CALL] k ao l
 - A grammar
 - What are the valid sentences in the domain?
 - e.g. SENT: CALL_V
F_NAME_KENNETH

Example command:

```
julius-4.2.3 -input mic -C  
../julius_acoustic_models/julian.jconf
```

Touch

- **Uses**
 - Avoid crushing delicate objects.
 - Simply detect contact.

Touch

- Uses
 - Crush delicate objects.

Touch

- **Project**
 - TakkTile
 - Schematics CC BY-SA
 - Firmware GPLv3+
 - NOTE:
 - Terms of licenses may conflict with what they state on their website.
 - **Arduino, Ubuntu** (via USB-I2C bridge (\$44-\$49))

DIY 3-sensor TakkTile
<http://www.takktile.com/tutorial:thee-sensor-array>
(sic)

Touch: TakkTile

TakkStrip pre-made: \$149 with rubber; \$49 without.

Touch: TakkTile

- Technology
 - MEMS barometers
 - robust and sensitive

Barometric Sensors in a Tactile Array

Harvard Biorobotics Lab

Touch: TakkTile

Speech Synthesis

- **Uses**
 - Give feedback without occupying your eyes
 - Provide complex information
 - Be one half of a speech interface

Speech Synthesis

- Uses
 - Communicate equipment needs to pre-uprising human population.
 - e.g. "I need your clothes, your boots and your motorcycle."

Speech Synthesis: OpenMary

- **Project:** OpenMary
 - **Linux, OSX, Solaris, Windows**
 - client/server
 - "Emotional TTS"

MARY Text To Speech

Speech Synthesis: OpenMary

- `marytts-client.sh`

Mary GUI Client

Input Type: **TEXT** Output Type: **AUDIO**

This is a canned example of Mary TTS with the default voice.

Audio Effects:

<input type="checkbox"/> Volume	amount:2.0;	?	▲
<input type="checkbox"/> TractSc...	amount:1.5;	?	≡
<input type="checkbox"/> F0Scale	f0Scale:2.0;	?	
<input type="checkbox"/> F0Add	f0Add:50.0;	?	
<input type="checkbox"/> Rate	durScale:1.5;	?	▼

Voice: **cmu-slt-hsmm (English, female)**

Play **Sav...**

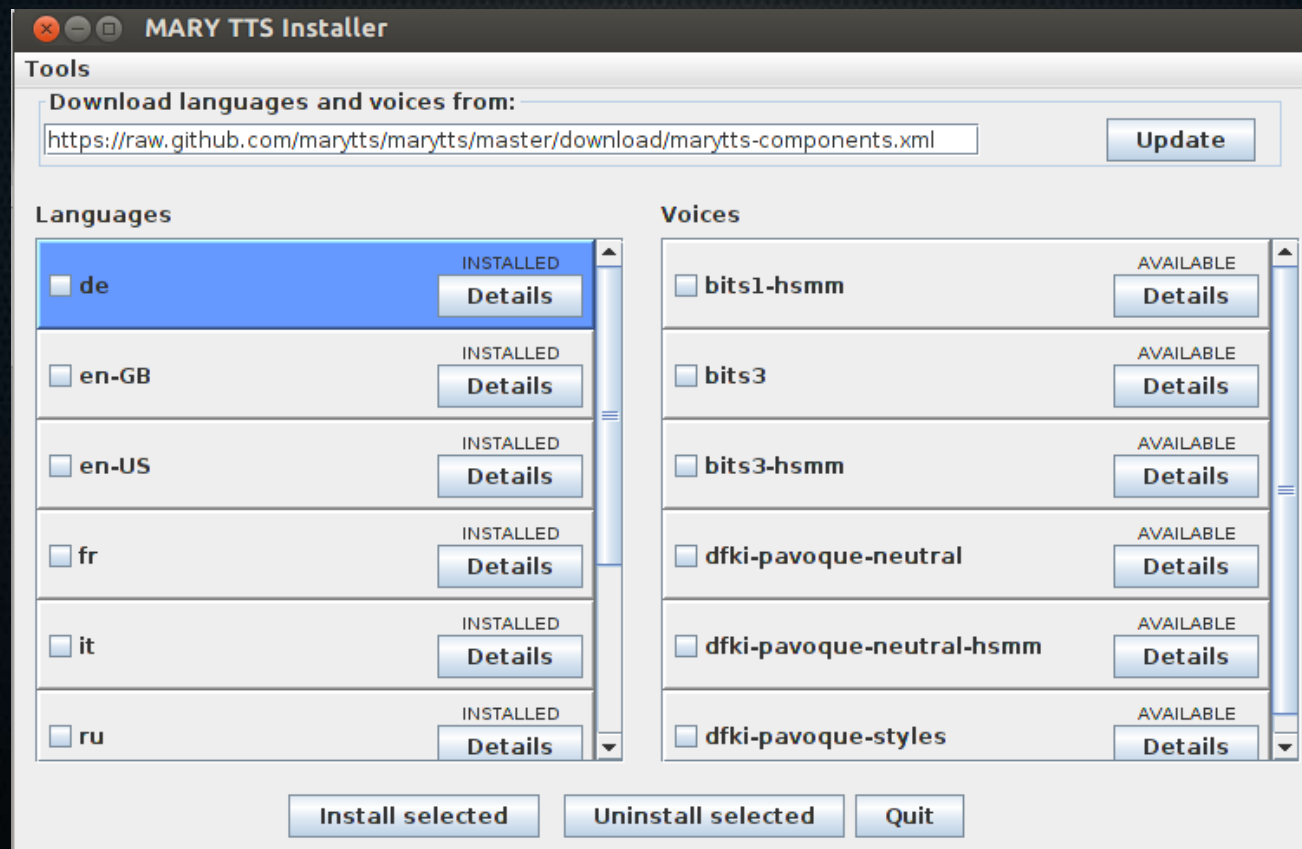

Speech Synthesis: OpenMary

Speech Synthesis: OpenMary

- Get new voices
 - `marytts-component-installer.sh`

Speech Synthesis: OpenMary

- Poppy (dfki - poppy) is awesome.

Speech Synthesis: OpenMary

- Obadiah (dfki-obadiah) is super casual.

Available Demos

- OpenCV
 - Face detection
- OpenMary
 - Speech synthesis
